TWICE TOLD TALES

Friend Jim: I just been reading a farm journal, saying that the most farmers are all the time being picked by the rest of the horde. Well, you know that the average farmer, or the man on the land is the most indolent, careless and trifling of all God's creation. He sits on the top rail of his fence and most all the time picks out a fat rail; there he will sit (if any one to talk to) and let the weeds take his corn. And you know that 100 days is just about the limit of his year's work.

Well, he don't complain much unless a lousy calf dies or a pig strays off. He is just the same all the year. In the winter, if he would burn lime instead of roasting his shins or sweet 'taters', he would be better in the swim. No sir, let an election day come round, which always does, he is the first man to be there and the last to leave. Craps are laid by and nothing to do but get a little firewood and haul in a load of nebbins to feed his old blind mule to carry him thru the winter to make another crop out of ground that has been run in corn for the past five years.

The right kind of farmer is the backbone and 'spare-rib' of our country, and will get there with both feet set forward and is not a drawback to the rest of mankind, and if he puts in half the time that the much despised doctor, lawyer or merchant does, he would be away ahead of the hounds.

Talking about hounds reminds me that the glorious chase season will soon be here again. Then Capt. Taylor and the bunch will be on the job; I can almost hear them now, as it is not so very far off, and what music they do make when they get old man fox on the dead run.
